

The Talent Development Model in Young Adults

Friday, 19 March, 2010
2 pm - 3.30 pm - Law North Theatre 5

inspiring achievement

FLINDERS UNIVERSITY
SCHOOL OF EDUCATION

PRESENTS

Professor Carolyn Callahan, University of Virginia

Commonwealth Professor of Education; Chair, Department of Leadership, Foundations, and Policy; and Associate Director, National Research Center on the Gifted and Talented, Curry School of Education.

Hear Professor Callahan discuss how the diversification of the college population presents unique challenges in ensuring the success of those students who don't fit the traditional college student mold (e.g. first generation college students, students from indigenous populations, students without the social capital of traditional students, etc.) What are the characteristics of secondary schools and university programs that have been successful in helping these students achieve the success that their potential portends?

Dr Carolyn M. Callahan is recognised as an outstanding teacher and scholar, receiving numerous awards and distinctions since her appointment to the Curry School of Education at the University of Virginia, where over the past 12 years she has developed the graduate program in gifted education, the Summer and Saturday Program for gifted students, and has been the director of the University of Virginia National Research Center on the Gifted and Talented. In collaboration with the other staff of the University of Virginia program, she has developed and delivered the highly successful annual Summer Institute on Academic Diversity for the past 5 years. Dr. Callahan has worked with over 300 public school districts across nearly every American state in the development of program designs, curriculum, and evaluations, informed by her broad research interests. She also sits on the editorial boards of *Gifted Child Quarterly*, *Journal for the Education of the Gifted*, and *Roeper Review*.
