

The Fraser Mustard Centre, named in honour of leading Canadian researcher and former Adelaide Thinker in Residence Dr Fraser Mustard, has been created to bring together leading Australian child researchers and innovative government policy makers and planners. The Centre is a research collaboration between the Department for Education and Child Development (DECD) and the Telethon Kids Institute. The Telethon Kids Institute has a proven track record of successfully translating research findings into actions that make a real difference to the lives of children. By working with the Department for Education and Child Development, key decision makers have first-hand access to the research that provides valuable insight into the development, education, health and wellbeing of children and young people.

The Fraser Mustard Centre is seeking expressions of interest to fill two research positions. In addition, there are opportunities for casual work on short term research projects that may be attractive to honours and masters level students. Working under the supervision of the Telethon Kids Institute, research staff will conduct literature reviews, assist with data analysis (quantitative or qualitative depending on the project), and draft reports. As an ideal candidate for these roles, you will have successfully completed a degree in a discipline related to Population Health, Child Development, Psychology, Statistics or Epidemiology.

Expressions of interest should include:

- a cover letter outlining your interest in the position
- a copy of your curriculum vitae with contact details of two referees

For further information about the research positions please contact Dr Yasmin Harman-Smith (08) 8207 2089 or Alanna Sincovich (08) 8207 2039.

Expressions of interest should be submitted by email to Alanna Sincovich:
